PRODUCT SPECIFICATION

MOUND AND PLATE

GAMETIME CLAY BRICKS

Unfired, compressed clay bricks for the pitcher's mound, bullpen, catcher's box and batter's box. Lay them, water them, tamp them.

SPECIFICATIONS

Material	Unfired, compressed clay
Brick size	4 x 8 x 2.5 inches
Colors	Red, gray
Baseball mound, high-stress areas	About 124 bricks (table and landing area)
Baseball batter's boxes, high-stress areas	About 120 bricks for both

PACKAGING

Bricks per pallet	320

FEATURES

- **Hold the shape.** Compressed bricks keep the mound slope and plate areas from wearing into holes.
- **Fast to install.** Uniform bricks lay tight and level, with no mixing and no guesswork.
- **Becomes firm clay.** Water the bricks and tamp them, and they bond into a solid clay base.
- **Lasts.** A dense base resists digging out, so the areas that wear fastest need less frequent repair.
- **Patch or rebuild.** Fix one worn spot or rebuild the whole table.

Recommended for: Baseball, softball, parks and recreation, youth leagues.

Application: Cut out the area to 3 inches, lay the bricks tight, water, and tamp. Top with GameTime Pitcher's Mound Clay.

Brick quantities are approximate. See the coverage chart for other field types. Values shown are typical and may vary slightly between lots.
